

Product Release Notes

Dear GreenRoad Customer,

We are pleased to share the new features included in the latest release of GreenRoad Central.

- Update to Route Reconstruction Report Settings
- Support AI events in our event log report
- Self-Service Mobile Driver Addition

Update to Route Reconstruction Report Settings

To improve system performance, we've adjusted default settings in the Route Reconstruction Report.

New Default Settings: The report now defaults to showing “Latitude” and “Longitude” columns instead of the “Address” column.

If necessary, you can add the Address column by selecting “Customize Columns.”

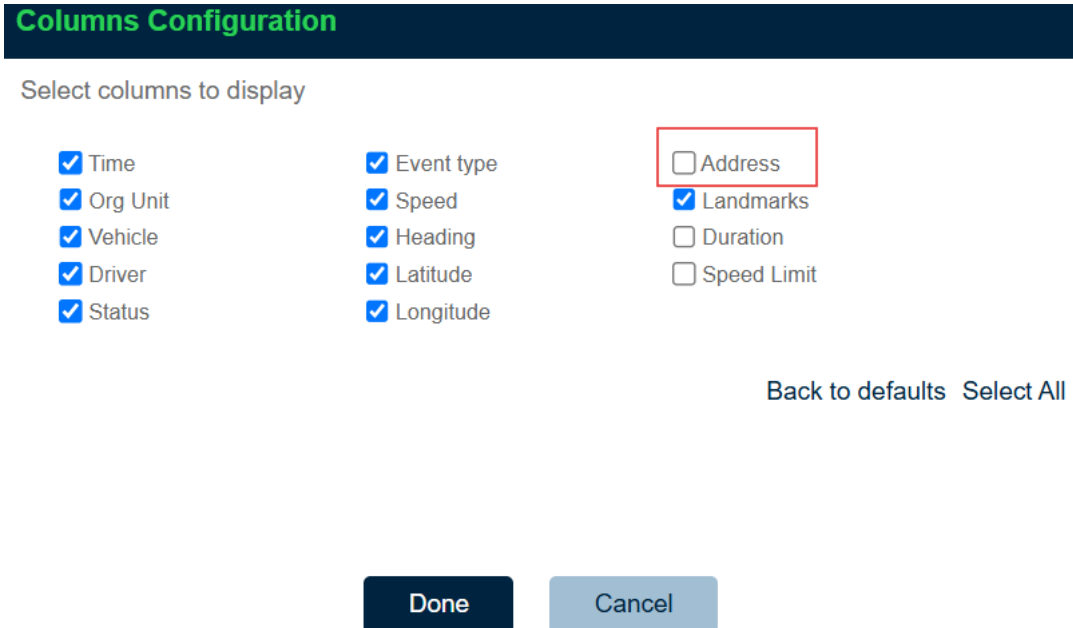

This update will **not** impact any reports you have already scheduled; it will only apply to new reports you set up.

If your report requires address information, you can easily add it by following these steps:

1. Click on the “Customize Columns” button.

2. Select the Address column and click “Done.”

Columns Configuration

Select columns to display

<input checked="" type="checkbox"/> Time	<input checked="" type="checkbox"/> Event type	<input type="checkbox"/> Address
<input checked="" type="checkbox"/> Org Unit	<input checked="" type="checkbox"/> Speed	<input checked="" type="checkbox"/> Landmarks
<input checked="" type="checkbox"/> Vehicle	<input checked="" type="checkbox"/> Heading	<input type="checkbox"/> Duration
<input checked="" type="checkbox"/> Driver	<input checked="" type="checkbox"/> Latitude	<input type="checkbox"/> Speed Limit
<input checked="" type="checkbox"/> Status	<input checked="" type="checkbox"/> Longitude	

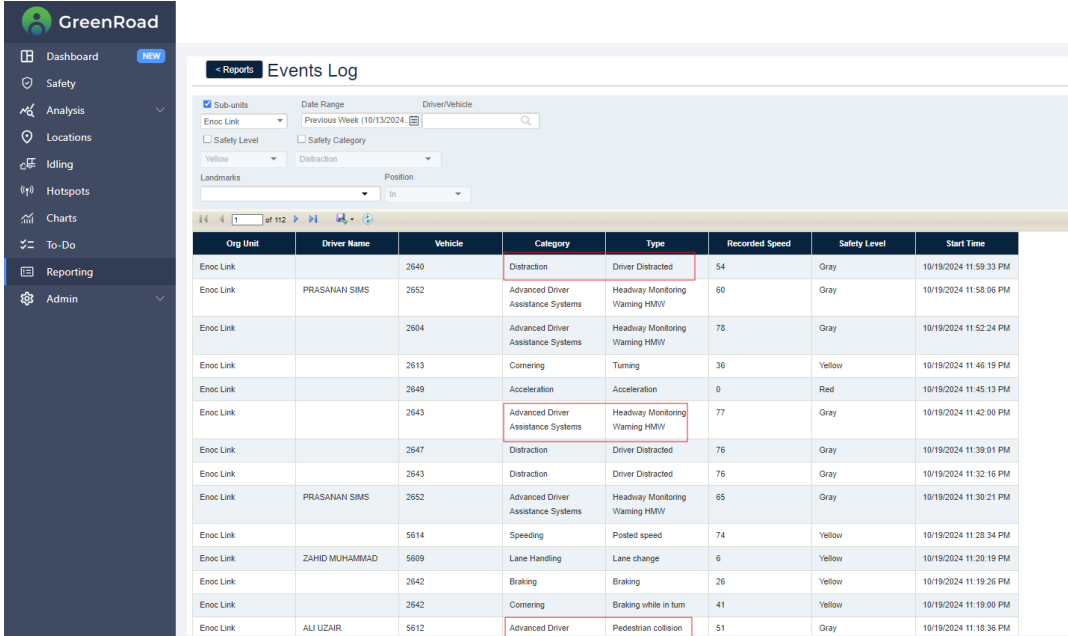

[Back to defaults](#) [Select All](#)

Done **Cancel**

This adjustment is part of our ongoing efforts to optimize reporting performance. The Address column places a significant load on the system, so if address information isn't essential, we encourage you to use the default “Latitude” and “Longitude” columns.

Support AI Events in Event Log Report.

Our reporting system now allows customers to view all AI events associated with each driver and vehicle over specific time periods, providing a comprehensive view of event data.

Org Unit	Driver Name	Vehicle	Category	Type	Recorded Speed	Safety Level	Start Time

Self-Service Mobile Driver Addition

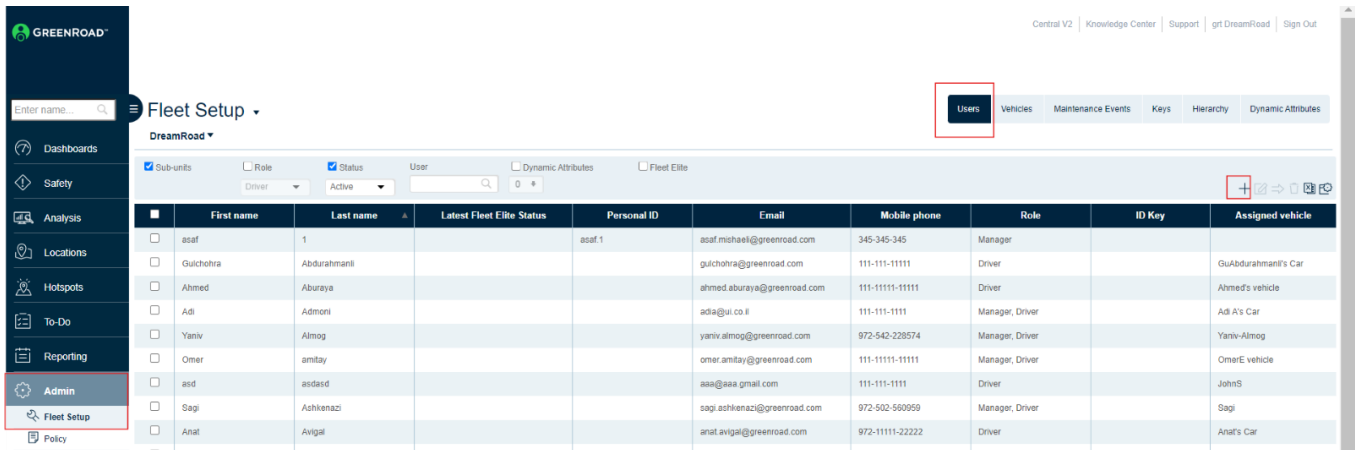

A new feature enables you to add Mobile users (either Drivers or Manager Drivers) to the Greenroad system directly from Central in a straightforward and seamless process.

You can now add users individually, one at a time, or through a bulk action. This feature is available for fleet managers using the Driver App solution only.

This feature enables managers to manage driver profiles efficiently without the need for support tickets.

Adding New Mobile Users Individually:

1. Go to the "Admin" menu.
2. Click "Fleet Setup" > "Users" Tab.
4. Click + to add a new user.

5. The “Add User” window will open. Complete the mandatory fields for each new Driver, including:

Add User

Permit issue date

This user is a Driver

This data is required for the automatic creation process of the vehicle that will be assigned to this user. Editing these fields should be done through the 'Vehicles' tab

Engine Type

Vehicle Type

Fleet Speed 136 MPH

ID Key No ID keys are available in the org. unit

Driver's license number

State/jurisdiction that issued the driver's license

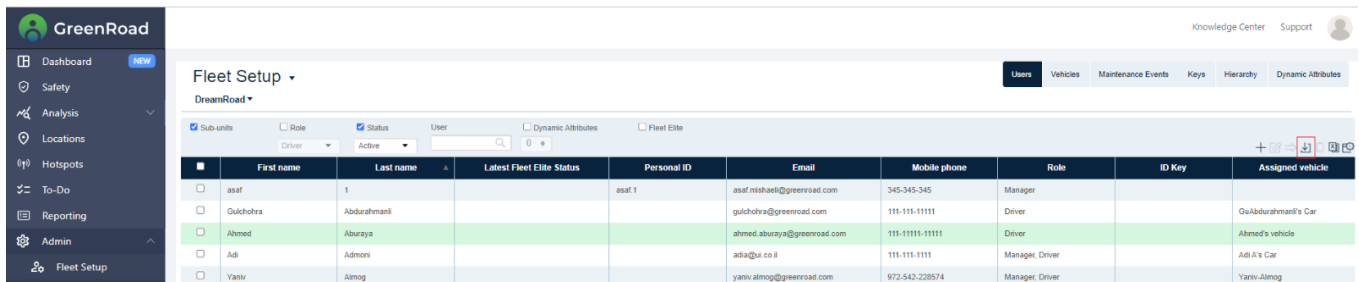

Send weekly email report: Yes No

- **Engine Type:** Select the engine type of the Driver’s vehicle from a pre-defined list
 - Diesel ICE
 - Gasoline ICE
 - Hybrid
 - Hybrid Plug-In
 - EV
 - Unknown
- **Vehicle Type:** Select the vehicle type of the driver’s vehicle from a pre-defined list. **This is important for setting telematic thresholds accurately.** Car – this is the **default**
 - 2-wheeler
 - Truck
 - Van
 - Bus
- **Fleet Speed:** Enter the maximum speed limit (20-220 km/h or 13-136 mph) for the driver. *Note:* The fleet speed limit is assigned to the virtual vehicle for this driver. Speeding events will be recorded against the lowest applicable speed limit, whether from posted limits or landmarks.

Adding Bulk Mobile Users

1. Go to the “Admin” menu.

2. Click "Fleet Setup" > "Users" Tab.
4. Click on the icon to add a bulk of new users.

5. Download the CSV template file, open it in Excel or any text editor, and add each new driver in a new row with all required fields.

Import Users

To import user data, you must first create a file in CSV format according to the instructions below. For a sample, please click [here](#).

Please note: only users whose roles are defined as Drivers or Manager Drivers can be imported.

The file can have a maximum of 500 rows.

The first row should be headers as follows:

- First Name (mandatory field)
- Last Name (mandatory field)
- Personal ID (mandatory field; must be unique)
- Email Address (mandatory field)
- Role (mandatory field)
- Mobile Phone Number (mandatory field)
- Vehicle Type (mandatory field)
- Engine Type (mandatory field)
- Fleet Speed (optional field)
- User name (optional field – for SSO users you must add this data in the predefined user format for your integration)

Set the system to define if and when to send the open account email which welcomes the user to the system and provides the login details.

Unn Save

OK

Cancel

6. Open the CSV file in Excel on any text editor.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	First Name	Last Name	Personal ID	Email*	Role*	Cell Num	Vehicle ty	Engine ty	Fleet spee	User Name							
2	Mandator	Mandator	Mandator	Mandator	Mandator	Mandator	Mandator	Mandator	Not mand	Not mandatory - for SSO users, add the user name as the predefined template							
3	Driverfirst	Driverlast	56789010		Driver	994-51624	Car	Unknown	220								
4																	
5																	
6																	
7																	

7. Add a bulk of new drivers in each new row with all the mandatory and optional fields.

Notes:

Important: Please remove the second and third rows from the template before uploading the file. These rows are provided as guidance only and should not be included in the upload.

Thank you for choosing GreenRoad!

We look forward to supporting your journey towards safer and more efficient driving.
