

DRIVE APP 7.2.0 RELEASE

ENHANCED SOLUTION FOR GREENROAD'S COMPREHENSIVE SPEED LIMIT OPTIONS AND MORE

We are pleased to release GreenRoad DRIVE™ Version 7.2.0 Mobile Application, with new Landmark fleet speed logic and Expense Report in Excel Format.

Landmark fleet speed new logic

GreenRoad provides a 3-tier system for speed limitations in GreenRoad DRIVE™.

1. Posted speed – Reflects the speed limitation posted on each road, backed by GreenRoad's maps provider.
2. Landmark Fleet speed – Speed limitation that is configured for a specific area on the map.
3. Fleet speed – The Speed limitation is set for all vehicles by the fleet manager definition

As of 7.2.0, when a driver drives inside a Landmark which has a configured speed limit, the speed limitation for this landmark and the Posted speed limitation on the road will apply.

In case of a conflict between the different mechanism of speed limitations the hierarchy will be as follows:

1. Posted speed (overrides both Landmark Fleet speed and Fleet speed)
2. Landmark Fleet speed (overrides Fleet speed only)
3. Fleet speed

Please note: This new logic applies to version 7.2.0. and above in lower versions speeding events will occur when one of the speed limitations is violated.

Few examples to explain the new logic

When the configuration of the speed limitations is:

1. Fleet speed – 60 km/h
2. Posted speed – 90 km/h
3. Landmark Fleet speed – 80 km/h
4. The driver travels inside the landmark at 70 km/h

The driver will not get a speeding alert because he does not exceed landmark fleet speed limit or the posted speed limit of the road

When the configuration of the speed limitations is:

1. Fleet speed – 60 km/h
2. Posted speed – 70 km/h
3. Landmark Fleet speed – 90 km/h
4. The driver travels inside the landmark at 80 km/h

The driver will get a speeding alert because he has exceeded the posted speed limit of the road

New – Expense report now available also in Excel Format

A new format was added to the Expenses report, which is generated from GreenRoad DRIVE™ application. In addition to PDF format, the report is now available in Excel format.

The mail will look as follows:
