

**GreenRoad Drive™ is a fully-digitalized safety management solution** used by fleets to improve driver behavior, reduce risk, increase operational efficiency and collect granular driver behavior data.

- 1 **Highly accurate real-time driver coaching:** empowers drivers to prevent accidents before they occur. Based on GreenRoad's proprietary driving behavior analysis technology, which accurately detects over 150 complex maneuvers of various severities.
- 2 **Proven driver engagement and training tools:** safety scores, team rankings, personalized driving tips, trip histories and analyses, and more.
- 3 **Proactive safety management-by-exception tools:** Real-time AI-based alerts for drivers and managers, fleet safety KPIs with full drill-down into underlying detail, trend analyses and more.

## Technical Specifications

		
OS support	Above 8.0	Above 13.0
Google services version	Above 11.9	N/A
Model	Test on demand	Above iPhone 5s
Data consumption	150 MB per month (100 driving hours)	
Battery consumption in trip	~10% per hour	
Battery consumption out of trip	Less than 1% per hour	
SDK	N/A	N/A
Tablet support	N/A	N/A
Landscape support	N/A	N/A
Memory in trip (MB)	50	46
Memory out of trip (MB)	60	160
CPU in trip	25%	30%
CPU out of trip	9%	10%
Gyro	Required	
GPS	Required	
BT	Required	
Motion activity detector	Required	
RAM	Without restriction	
CPU	Without restriction	
APK/IPA size (MB)	50	70
